# SUNWELL SYSTEM

# COMPANY PROFILE

**SUNWELL
SYSTEM**

PT. Sunwell System Technologies began
as an Independent Custom Software Vendor
that gives freedom to business on how business software
shouldbe employed to empower business **agility**, easily **adaptive**
fornew business changes, without having to be "locked down" to
vendor.

# OUR PHILOSOPHY

We believe every business has its **uniqueness** so the technology adopted should not diminish that uniqueness. The key to develop a fully usable solution is to fully understand the problem, and this requirescollaboration andobservation from many point of views.

01

# COMPANY GROWTH

- **2005**
  Founded in Bandung, West Java, Indonesia.

- **2007**
  We go the extra mile to build our software platform, a not-so-common approach for a startup. Proudly this platform had proven to be scalable for the next 10+ years.

- **2010**
  CV Sunwell System established.

- **2012**
  Introduced our remote development and managed service model.

- **2019**
  Another extra mile to build our next-generation platform using new technology to answer future challenges.

- **2021**
  PT Sunwell System Technologies established.

04

# OUR PRODUCTS

"You've got to start with the customer experience and work back toward the technology – not the other way around."
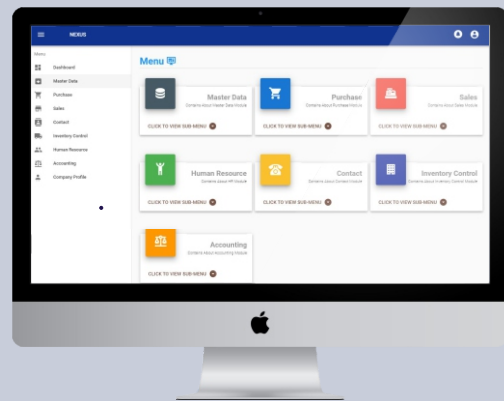

**-Steve Jobs-**

## NEXUS

Nexus is an ERP platform that is divided into several modules that have the role of integrating and automating business processes.

The modules are:
- Purchase
- Sales
- Master Data
- Inventory Control
- Human Resource
- Accounting
- Business Partner
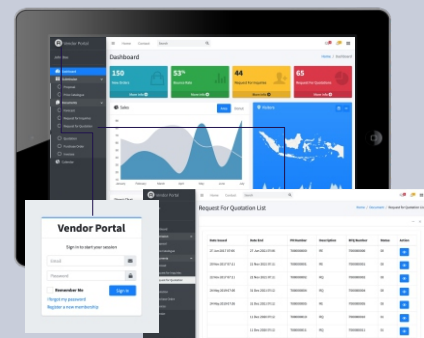

## MOBILE APPLICATION DEVELOPMENT

Warehouse Management System (WMS) is an application that supports inventory control and warehousing activities. Features that can be accessed via smartphones and desktops (browsers) such as :

- Inbound Logistic
- Outbound Logistic
- Stock Transfer
- Physical Stock Counting
- Stock Availability
- Report

## SAP ADD-ON DEVELOPMENT

Vendor Portal App is an application that connects vendors with companies to support procurement activities, where both parties can enter documents related to quotations and invoices.

This application is integrated with SAP as the company's main information system.

# OUR SERVICES

## Custom Software Development

We employ agile and iterative software development with close engagement with our clients to ensure developed software suits the requirements we agreed upon.

Most of our custom software developments are project-based, whether onsite, remote, or mixed.

## Smart System Development

Together with our academic partners in the field of Artificial Intelligence (AI), Machine Learning (ML), and Big Data Analysis, we ready to answer your needs to build smart systems.

## System Maintenance and Support

Today businesses are demanding more flexibility and faster deployment of their software systems, yet many developed software is too complex and hard to change.
Employing DevOps and sound architectural design we continuously support, maintaining, and expanding our existing software to maximize our client's investment.

## Managed Service

Outsourcing the responsibility for maintaining, and anticipating need for, a range of processes and functions, ostensibly for the purpose of improved operations and reduced budgetary expenditures.
